

FOLD YOUR OWN VENUS FLY-TRAP! Carefully cut out the above large square along the solid lines. Colour the four corner squares leaf green, leaving the 'teeth' white or coloured yellow. Colour the rectangles between them red or pink, leaving the pointy 'hairs' white or yellow. Leave the centre square white and colour the squashed flies, adding more flies if you wish. Now fold the whole thing into a simple origami fortune teller, starting with the printed side face down. When finished it should look like the drawing (right). Dare a friend to touch two or more of the trigger hairs on view inside. Then unexpectedly grab their finger. Look under the last flap they touched to see if you caught a fly! ©Mike Barfield
